About the Clerics

The Clerics live in a rocky fireland called Ignadon and are a tribe of highly industrialized Technomages.

They devoted themselves to the fight for their god Calaan, to science and to the production of powerful MECH warriors.

They are trying to put together a powerful army to cleanse their lands from the Elex-ridden Albs.

They strongly believe in maintaining purity of the body and therefore reject ELEX.

They try to convert the free people to their beliefs and promise salvation.
